About Me

For more than 10 years I have developed a wide range of skills including graphic design, web management, software development, and project management. My desire to continuously learn and grow both personally and professionally has helped me to continue to thrive in new environments and with teams of all sizes. I am excited to continue my journey and do amazing things with you.

Skills

Languages: HTML, CSS, Javascript, Python, C#, SQL
Frameworks/ Libraries: Django, ASP.Net, Bootstrap, jQuery, Knockout.js, Node.js, Socket.io
IDEs: Visual Studio Code, Visual Studio 2019, PyCharm, Atom
Methodologies: Agile, Scrum
Graphic Design: Adobe Illustrator, Adobe InDesign, Adobe Photoshop
CMS: Magento, Miva Merchant
Business Domains: eCommerce

Experience Summary

Python/ Django: Developed collection tracking application using Django framework in Visual Studio Code. This application included database management, scraping XML from an API call and using BeautifulSoup to scrape HTML for content. Additional experience includes developing an application to sort and delete files from a provided directory using PyCharm.

C#/ ASP.Net: Collaborated with a team of developers to add features to a local theatre website in Visual Studio 2019. Tasks included modifying the messaging page to display deleted messages and provide search functionality as well as modify how images were uploaded and displayed. These tasks involved modifying the model structure, creating new controller functions and editing view pages.

Javascript: Developed multiple applications to assist in playing role playing games remotely. Applications include a virtual tabletop tun using Node.js that utilizes Socket.io to enable real-time interaction between players to track dice rolls and encounter progress. Have also used Knockout.js to develop a proof of concept for a character generation application.

Job History
